42+ MODULES FOR END-TO-END EFFICIENCY

Enhance Decision-Making with Business Intelligence (BI)

Datamate's BI solution empowers data-driven decisions with scalable Power BI tools. Here's more of what our BI solution brings to the table:

- Real-time insights eliminating guesswork in decision-making.
- Monitor key metrics and revenue opportunities for improved performance.
- Enhance operational efficiency and reduce costs.
- Track relevant KPIs, identify trends, and meet performance targets.
- Understand customer behaviours for personalized strategies.

OPTIMIZE YOUR OPERATIONS AND EMPOWER PATIENTS WITH OPTIONAL MODULES

Patient Portal

Patient Portal transforms your hospital website into a comprehensive platform for patients. Here are some features of the portal that enhance the patient experience and benefit your hospital:

- Book Appointments online
- View Appointments history
- Add your family members under a common user ID
- Cancel your appointments online
- Get your appointments slips printed
- View/Print Patients Medical Record Sheet
- Labs and Diagnostic Test Results to Patients
- Book your medical package in advance
- Radiology Results View to Patients
- View File attachments of patients

Patient Mobile App

Patient Care Appointment Booking Mobile app enables seamless, instant consultation scheduling with doctors via smartphones. Hospitals can customize it for branding and launch on Google Play Store and Apple Store.

Features:

Priority Features of the Patient Care Appointment Booking Mobile App:

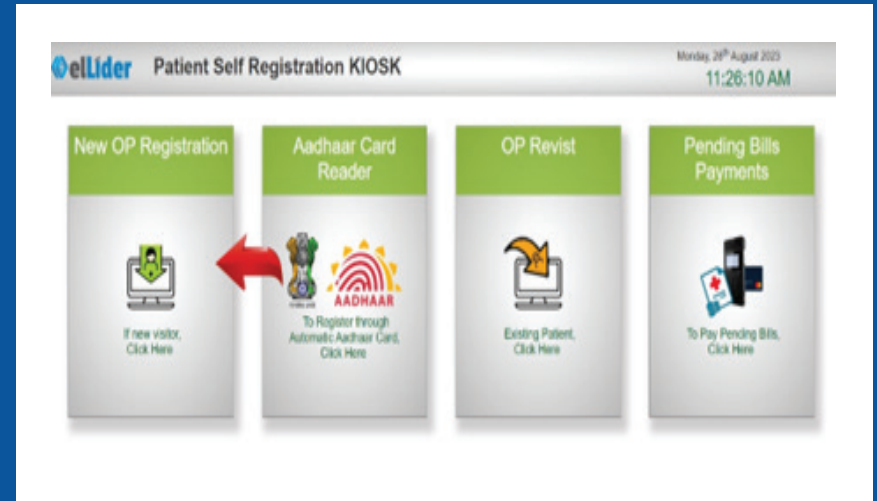

- Easy and secure login
- Register new patients
- Book appointments
- Consult the doctor through a video call
- Secure in-app payments
- View lab/radiology results and prescriptions
- Easy feedback collection
- Google Maps integration
- Add family members
- Graphical representation of test results

Patient Self-Service Kiosk

Datamate's Patient Self-Service Kiosk helps reinvent hospitals with:

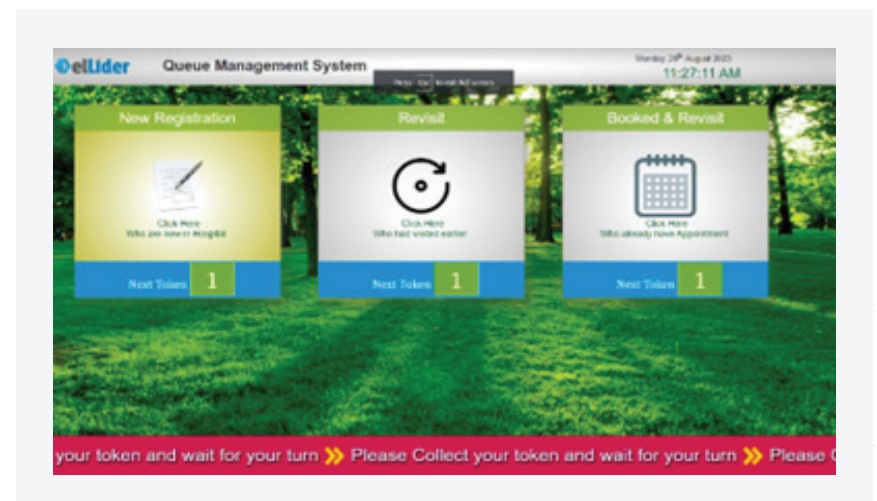

- Queue-free patient registrations and bill payments
- Automated processes for enhanced efficiency
- Faster, paperless experiences and heightened satisfaction
- Cost optimization by reducing operational expenses and staff needs
- Key Features: Easy patient registration, Aadhaar card integration, and simplified billing.

Queue Management System

Datamate's Queue Management System optimizes hospital queues with powerful software, integrating ticket dispensers and display systems. Efficiently manage queues at hospital outlets, enhancing visitor experience and reputation.

- Serve multiple outlets with a single solution
- Display customizable, interactive messages and advertisements
- Call/Recall tokens
- Configurable alert tones
- Add any number of display units and counters
- Customizable to hospital requirements

Vconsult Teleconsultation Solution

eLíder's Vconsult Teleconsultation Solution powers hospitals with leading technology to deliver care remotely. The solution connects patients and physicians quickly and securely through video communication, expanding the access to care delivery to the convenience of both patients and doctors

- One-to-one video interaction
- Low Bandwidth HD video
- Consult patients from anywhere, anytime
- Seamless integration with eLíder EMR
- Payment gateway integration
- Automated E-prescription facility
- Live Chat
- One-click screen sharing

WhatsApp Integration

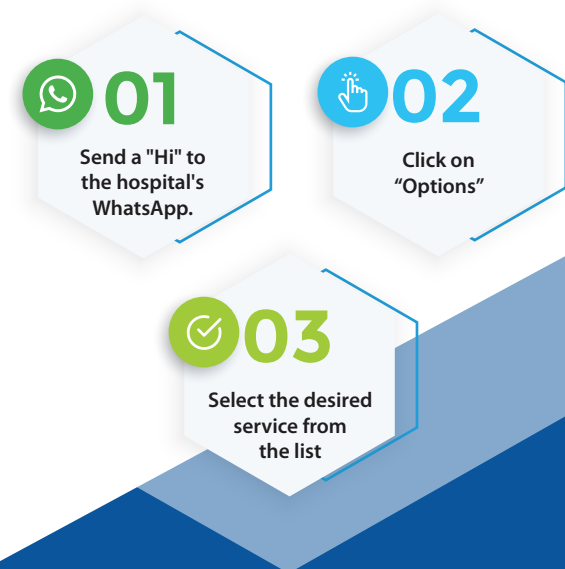

eLíder, the comprehensive hospital information system developed by Datamate, now offers advanced features that integrate with WhatsApp to enhance efficiency and streamline communication. These features include:

- Appointment scheduling with doctors
- Easy viewing of lab results
- Access to invoice copies in pdf format
- Sending of intimation messages such as welcome messages, thanks messages, confirmations, and reminders, among others.

Benefits of Setting up WhatsApp services through eLíder :

- Convenient Services via WhatsApp
- Easy information sharing and updates
- Secure information transmission
- Save time and improve communication
- Improved patient engagement
- Cost-effective alternative to traditional communication

The patient can sign up for hospital services through WhatsApp in
3 simple steps

Patient Feedback System

Patient Feedback System helps you understand and improve patient experience and satisfaction. With our system, you can:

- Collect feedback from patients in real time, so you can address any issues immediately.
- Tailor the feedback survey to your specific needs, so you get the information you need to improve patient care.
- Analyze the feedback data to identify areas for improvement.
- Track the progress of your improvement efforts over time

SMS Management

SMS Management is a powerful and easy tool for application-to-person SMS messaging services. The hospital can alert patients, doctors, suppliers, vendors, hospital management, etc., on various transactions from ELÍder Hospital Information System installed at the hospital.

Interfacing

Lab Equipment Interfacing Services from Datamate connects and integrates lab instruments with computer systems, allowing seamless data exchange. Datamate has interfaced with more than 200 models of medical laboratory equipment, third-party applications, and systems in hospitals across India and abroad over the last 30 years

- Better Sample Analysis
- Faster & High Precision results
- Increased Productivity & Functionality
- No more Manual Entries & Errors
- Efficient Report Generation
- Improved Trust among patients

Ensure High Availability of Data with Database Maintenance Services

Datamate's proficient team of DB experts helps organizations streamline database maintenance activities and diminish database issues.

- Manage, monitor, and protect your hospital's critical data.
- Consistent and automated DB health check practices result in less troubleshooting and ensure high-performance for the solutions.
